

At What Point Do We Say Enough?

Communists (e.g., Russia and China) are in a life-and-death war against Democracies (e.g., US, Europe, etc.). Let's briefly step back and see some examples of where our opponents are attacking, and what successes they have had to date:

Target: Religion. Strategy: Undermine Judeo-Christian beliefs and morality

Target: Men. Strategy: Emasculate, feminize and weaken men

Target: Women. Strategy: Defeminize them, inflate discrimination claims about them, etc.

Target: Families. Strategy: Redefine conventional family, and undercut its importance

Target: Education. Strategy: Propagandize children. Emphasize conformity over critical thinking. Install grade inflation. Etc.

Target: Initiative. Strategy: Award participation instead of accomplishment

Target: People. Strategy: Give the planet's rights priority over those of humans

Target: Economy. Strategy: Waste enormous sums on foolishness like climate change

Target: Industrialization. Strategy: Corrupt the electric grid with unreliable, expensive renewable energy. Oppose fossil fuels and nuclear energy.

Target: Science. Strategy: Use wayward scientists to misdirect real Science analyses, and to confuse the public about what Science really is

Target: Unity. Strategy: Inflame racism to incite discord and distrust among citizens

Target: Patriotism. Strategy: Inject wokism to sabotage citizen support for their country

Target: Propaganda. Strategy: Have mainstream media be a major source of disinformation

Target: Civility. Strategy: Support social media where there are personal attacks on any who dare to express opinions that differ from current political agendas

Target: Elections. Strategy: Corrupt the election process so that weak leaders are elected

Target: Legislators. Strategy: Promote petty political agendas over the country's welfare

Target: Military. Strategy: Use most of the above tactics to weaken our military

Target: Health. Strategy: Test that the above are working by creating and spreading a weak virus to confirm that bureaucratic response is unscientific and incompetent

Target: Indoctrination. Strategy: Test that the above are working by seeing if hundreds of millions of people accept mandates to get injected by an unproven, unknown, experimental bio-chemical concoction

Target: Resolve. Strategy: Test that the above are working by an unprovoked attack on citizens of a large non-communist country

We are like lobsters in a pot where the temperature is gradually increasing. We have been warned before (e.g., see [here](#), [here](#) and [here](#)). *Had enough yet?*
